Practical-II Storage as service using AWS

Name: Shreya Nadkarni

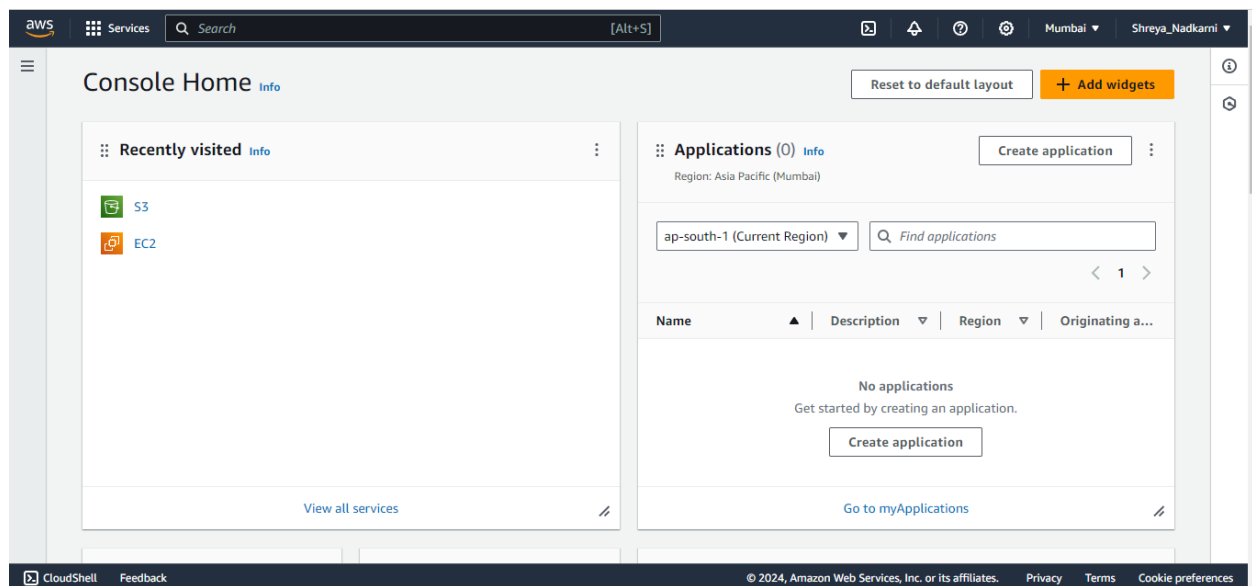

SAP ID: 86062300047

Roll No: A042

QUES 1: Steps for Implementing S3 for Uploading a File, Video, etc.

1. Access the S3 Service:

- Navigate to the S3 service from the AWS Management Console.

2. Create a Bucket:

- Click on "Create bucket".
- Enter a unique bucket name and select a region.
- Configure options such as versioning and logging if needed, then click "Create bucket".

Storage

Amazon S3

Store and retrieve any amount of data from anywhere

Amazon S3 is an object storage service that offers industry-leading scalability, data availability, security, and performance.

Create a bucket

Every object in S3 is stored in a bucket. To upload files and folders to S3, you'll need to create a bucket where the objects will be stored.

Create bucket

How it works

Pricing

With S3, there are no minimum fees. You only pay for what you use. Prices are based on the location of your S3 bucket.

Estimate your monthly bill using the [AWS Simple Monthly Calculator](#)

Create bucket

Info

Buckets are containers for data stored in S3.

General configuration

AWS Region

Asia Pacific (Mumbai) ap-south-1

Bucket name

Info

pract1-bucket

Bucket name must be unique within the global namespace and follow the bucket naming rules. [See rules for bucket naming](#)

Copy settings from existing bucket - optional

Only the bucket settings in the following configuration are copied.

Choose bucket

Format: s3://bucket/prefix

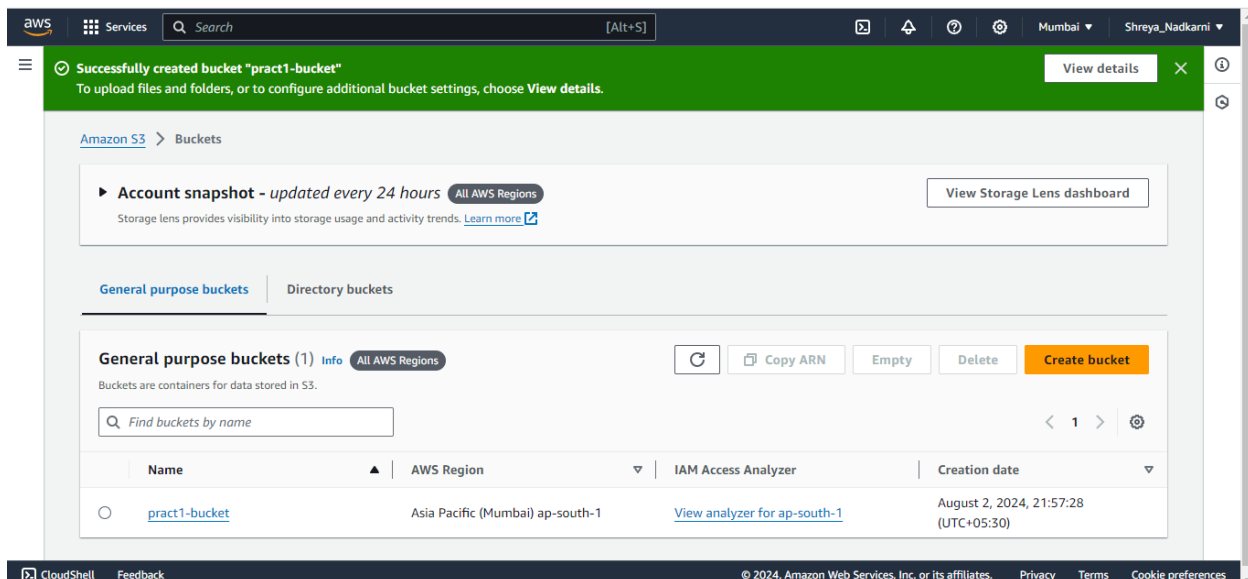

Object Ownership

Info

Control ownership of objects written to this bucket from other AWS accounts and the use of access control lists (ACLs). Object ownership determines who can specify access to objects.

3. Upload a File:

- Select the newly created bucket.
- Click on the "Upload" button.
- Drag and drop your file(s) or click "Add files" to browse and select the file(s) you want to upload.
- Click "Upload".

4. Access your content:

- After the image is visible click on it.
- Click on "open".

QUES2. Steps for Implementing S3 for Uploading a Static Website

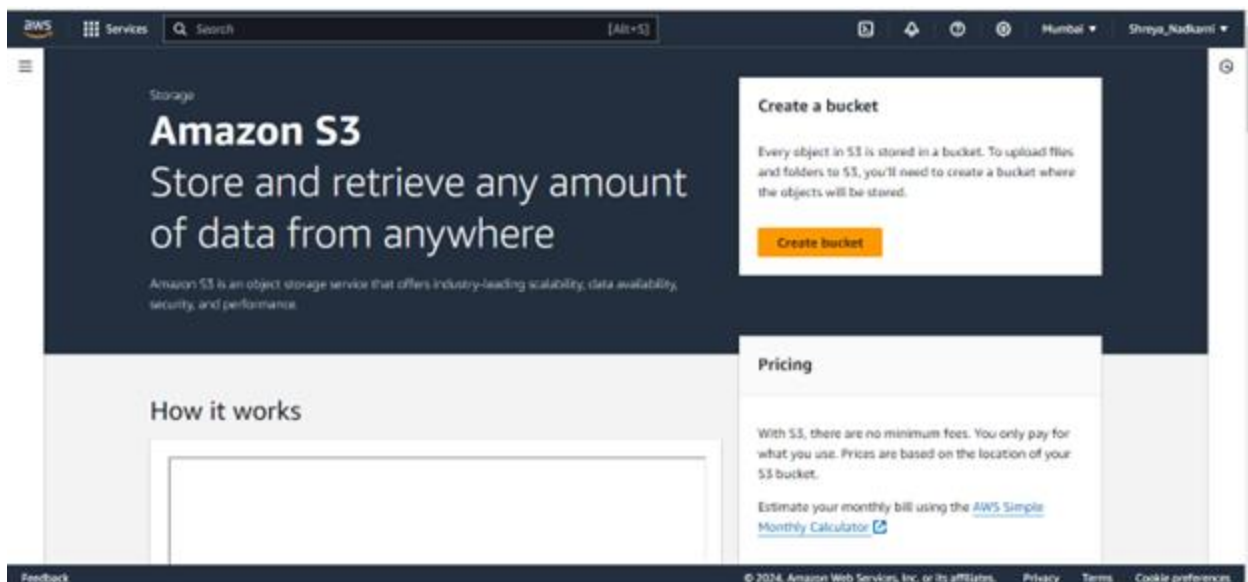

1. Access the S3 Service:

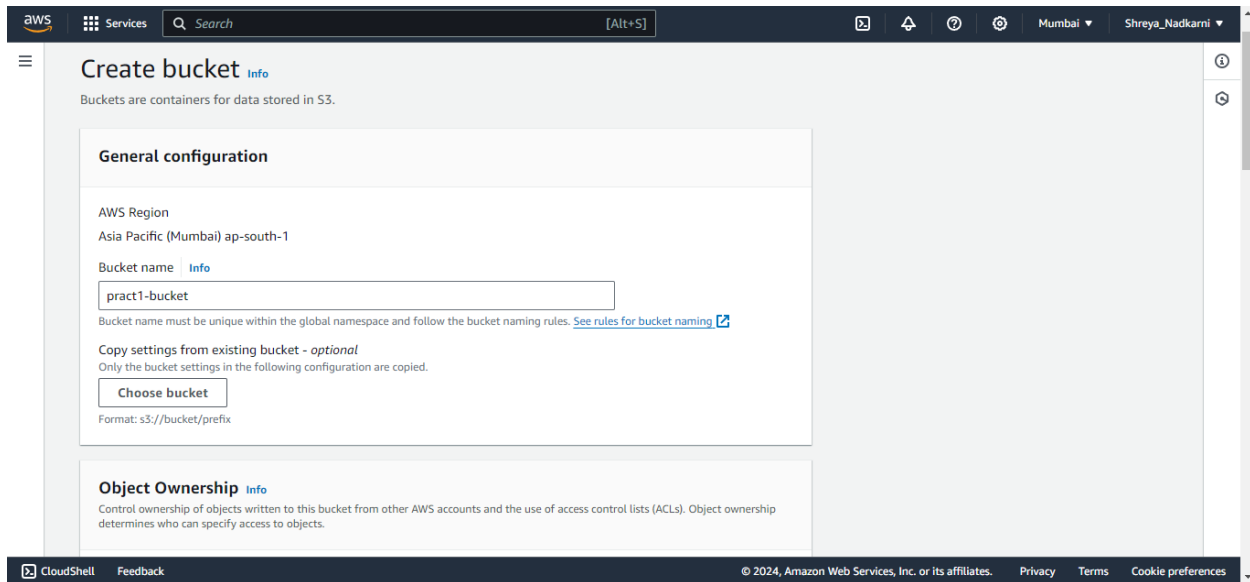

- Navigate to the S3 service from the AWS Management Console.

2. Create a Bucket:

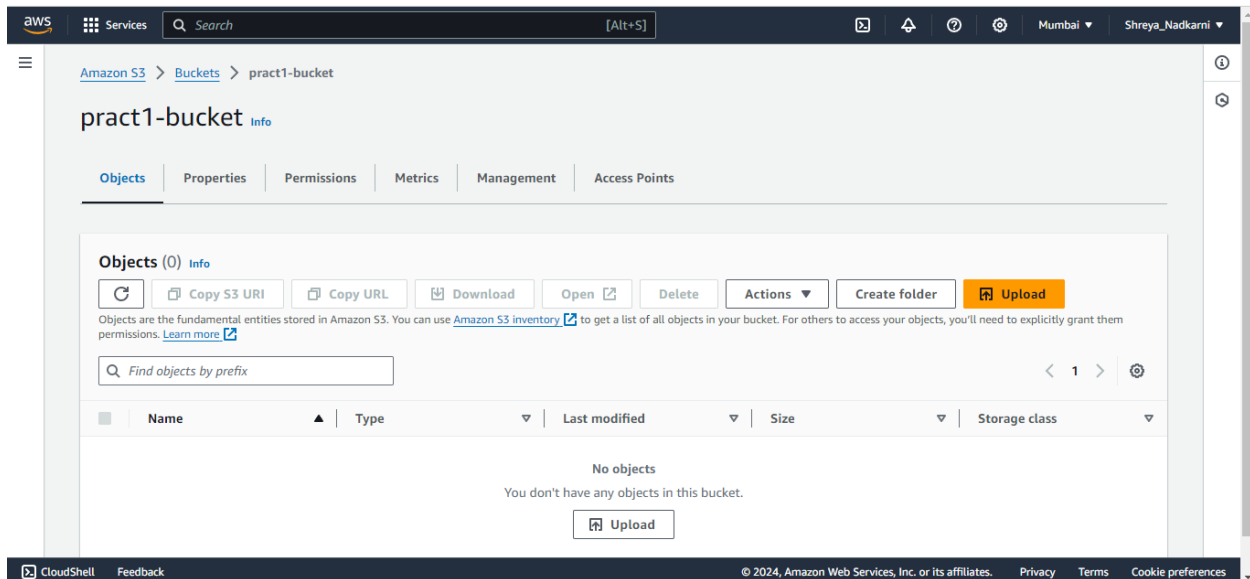

- Click on "Create bucket".
- Enter a unique bucket name. (For static website hosting, the bucket name should match your domain name if you're using a custom domain, e.g., www.example.com).
- Select a region and click "Create bucket".

3. upload Website Files:

- Drag and drop your website files or click "Add files" to browse and select them.
- Click "Upload".
